

Course Outcome	Assessment	POC
Demonstrate medical knowledge about select health problems to include pathophysiology, patient presentation, differential diagnosis, patient management, health promotion and disease prevention, and application of this knowledge to patient care in a family practice outpatient setting as it pertains to pediatrics, adult, and geriatric populations with acute, chronic and preventive concerns.	Written Exam, Preceptor Evaluation	K1
Perform focused history & physical examinations on patients seeking care in the primary care setting, including pediatric, adult and geriatric patients with acute, chronic and preventive concerns. Generate and document thorough assessments & plans as it pertains to pediatrics, adult, and geriatric populations.	Case Study Note, Preceptor Evaluation	S3
Use evidence-based practice principles to answer clinical questions related to current disease management for conditions commonly encountered in the primary care setting as it pertains to pediatrics, adult, and geriatric populations	Written Exam	S5
Considering the breadth and depth of primary care medicine, demonstrate proficiency and adaptability in knowledge, interpersonal, clinical and technical skills, professional behaviors, clinical reasoning, and problem-solving abilities for adult and geriatric patients. (care for the pediatric patient is further assessed in the pediatric rotations)	Preceptor Evaluation	All
Proper documentation of performance of all patient assessments, management plans, & patient education for health problems seen in an outpatient setting for all age groups.	Encounter Logging	VA2
